Rascorol Fleece 120

PP-based reinforcement fabric for embedding in Rascorol pro

For embedding and reinforcing Rascorol pro on critical, e.g. crack-endangered substrates and for maintaining the required layer thicknesses.

PRODUCT FEATURES

· Recommended for critical substrates
· Frost-free at least 24 months shelf-life

TECHNICAL DATA

Width	1,050 mm
Thickness	0.7 mm
Color	white
Material	100% PP
Weight	≥ 120 g/m²

## DELIVERY UNITS

50 rm / 52,5 m² / roll

GENERAL NOTES

In case of sealing or maintenance work the relevant standards and guidelines must be followed.
APPLICATION

· Rascorol Fleece 120 hast to be cut to the relevant length and embedded fully and firmly using suitable tools into the first fresh layer of Rascorol pro.
· Following fleece sheets have to be applied with a minimum of 5 cm overlapping at the edges.
· Then Rascorol pro is applied in the required layer thickness.
· If work is interrupted, make sure that before application of the second layer of Rascorol pro, Rascorol Fleece 120 has not been moistened with dew or rain.
· Rascorol Fleece 120 should be embedded in the centre of the completed, two-layered Rascorol pro and should not protrude out of the coating in any place.

SPECIAL NOTES

· Rascorol Fleece 120 is to be protected from sun, rain and frost before and during application until Rascorol pro is completely dry.
· Information relating to Rascorol pro and other product ranges can be found on our website http://www.rasco-bitumen.com
